**Care Instruction:**

**How to clean a frying pan?**

The maintenance of a frying pan is essential if you want to keep it for many years, here are our tips to extend the life of your purchase: The non-abrasive sponge is essential to take care of it. After each use, wash the inside of your frying pan with water and washing-up liquid. If the pan sticks, let it sink into the sink for a few minutes.

**What is PFOA?**

PFOA, a kind of glue that can fix the coating, is an endocrine disruptor possibly carcinogenic. This substance can migrate during heating at very high temperatures. Before buying a frying pan, it is best to check that this chemical component isn't present in the composition of the coating in contact with food.
