

### **Herzberg HG-5002: Multi-Orientation Aluminum Folding Ladder**

Heavy-duty aluminum ladder with 7 versatile configurations. EN131 standard compliant for safety. Large joint with security locks, anti-slip rubber sole, quick assembly, and a 150kg load capacity make it a professional-grade choice.

**Manufacturer: Herzberg Professional Tools**  
**Reference:HG-5002**

#### **Product Description and Specification**

Introducing the Herzberg HG-5002 Aluminum Multi-Purpose Ladder, your ultimate solution for tackling a wide range of tasks with ease and versatility. Crafted from heavy-duty high-grade aluminum construction, this ladder boasts a robust 1.2mm thickness, square rungs, and supporting tubes, ensuring stability and safety. It meets the EN131 standard, signifying exceptional quality and performance.

What truly distinguishes this ladder is its large joint, enhancing loading capacity and durability, supported by six security locks that enable you to adjust the ladder's shape quickly and securely. No more slipping concerns, thanks to the ladder's anti-slip rubber sole that ensures a secure grip during use.

This ladder is your multifunctional companion, capable of transforming into various configurations, including a scaffold, leaning ladder, and stepladder, to adapt to different height requirements and project needs. With a maximum load capacity of

150 kg and conveniently spaced 280mm between each step, this ladder is both sturdy and efficient.

Crafted from aircraft-grade aluminum, it is perfect for a multitude of tasks, from decorating and cleaning windows to roof and balcony work, painting, and a variety of DIY jobs. Rest assured, it has met the stringent EN 131-Part 4:2007 test standard, ensuring top-tier quality.

The Herzberg HG-5002 Aluminum Multi-Purpose Ladder is your answer to every task, offering durability, versatility, and security. Experience its easy reassembly with locks and hinges for enhanced safety. Say goodbye to slipping accidents, thanks to the ladder's anti-slip base design, ensuring your peace of mind during every project.

Experience the Herzberg HG-5002 Aluminum Multi-Purpose Ladder, and unlock the potential for effortless, safe, and versatile work. Perfect for both home and business use, this ladder adapts to seven different formations to meet your unique project needs. Add it to your toolkit today and elevate your DIY and professional tasks to new heights.

## Features:

**Heavy-Duty Aluminum Construction:** Crafted from high-grade aluminum with a substantial 1.2mm thickness, this ladder is engineered for robustness and stability. It can withstand the rigors of various tasks, ensuring it remains your reliable companion for years. **Versatile Functionality:** The Herzberg HG-5002 is not just a ladder; It's a versatile tool that adapts to your specific project needs. With seven different configurations at your disposal, including scaffold, leaning ladder, and stepladder modes, you can effortlessly tackle a wide range of tasks, from painting high walls to accessing roofs or ceilings. This adaptability makes it an indispensable addition to your toolkit. **EN131 Standard Compliance:** Safety is paramount, and this ladder is designed with your well-being in mind. It complies with the stringent EN131 standard, assuring you that it meets the highest quality and safety standards. This certification offers peace of mind during your projects, knowing that you're using a ladder built to the strictest industry requirements. **Large Joint with Security Locks:** The ladder features a robust, large joint supported by six security locks. This design ensures that the ladder's shape remains stable and secure during use, eliminating any wobbling or instability. You can trust in the ladder's structural integrity, even during heavy-duty tasks. **Anti-Slip Rubber Sole:** Safety first. The ladder's feet are equipped with an anti-slip rubber sole. This feature prevents unwanted sliding, providing a secure and stable grip on various surfaces. You can confidently work at height without worrying about slipping accidents. **Efficient 12-Step Design:** With 12 evenly spaced steps and a convenient 280mm distance between each step, this ladder is designed for ease and efficiency. Climbing and descending are made more comfortable, saving you time and effort during your projects. **Aircraft-Grade Aluminum:** The ladder's construction utilizes aircraft-grade aluminum alloy. This material choice not only ensures exceptional strength but also guarantees the ladder's longevity. You're investing in a tool that's built to last. **Quick and Easy Assembly:** Time is precious, and this ladder is designed with that in mind. Assembling and disassembling the ladder is quick and effortless. You can spend more time on your projects and less time on ladder setup. **Multi-Purpose Applications:** Whether you're cleaning windows, painting walls, or working on roofs and balconies, this ladder is your versatile partner. It adapts to a wide range of tasks, eliminating the need for multiple ladders and simplifying your toolkit. **Professional-Grade Durability:** Designed to withstand heavy workloads, this ladder has a maximum load capacity of 150kg. This remarkable load-bearing capacity ensures that you can rely on it for various projects, from DIY home improvements to professional tasks. It's a sturdy and dependable choice for all your work at height.
