### **Herzberg HG-5260: Aluminum Telescopic Ladder with Anti Slip Footing - 2.6M**

### **Herzberg HG-5260: Aluminum Telescopic Ladder with Anti Slip Footing - 2.6M**

Introducing the Herzberg HG-5260: Aluminum Telescopic Ladder with Anti Slip Footing, the ultimate tool for both occasional handymen and professional construction workers. This 2.60m telescopic ladder is not only the most convenient but also the most robust in the world, adhering to the standard EN131 for safety and performance. With its 2.60m height, you can confidently work at various heights without any worries.

Designed for maximum convenience, this telescopic ladder is foldable and compact, weighing only 7 kg and collapsing to a width of 46.5cm. Transportation and storage become a breeze, making it the ideal DIY tool for any project.

Safety and performance are the highlights of this Herzberg ladder. Sturdy, stable, and equipped with elastomer suspension, you won't need external support while using it. Complete your DIY projects with ease and efficiency, even in challenging

yards, saving both time and effort.

Made of high-quality anodized aluminum, this telescopic ladder can maintain perfect balance on any terrain, offering unbeatable value for your money. Its versatility knows no bounds, allowing you to use it everywhere and in any situation, even for those who may have physical limitations.

The Herzberg HG-5260 features a high-quality aluminum construction with a thickness of 1.3mm for durability and longevity. Each step is positioned 300mm apart with a step thickness of 1.3mm, providing a stable and secure footing. Anti-slip feet enhance safety and prevent accidents during use. The ladder can be positioned at multiple angles, offering flexibility for various tasks. Its sturdy 2.6mm thick hinge ensures stability and reliability during use. The adjustable lever allows for changes to the ladder's length, providing versatility for different projects. A convenient slide grid lock mechanism allows for easy collapsing of the ladder's steps for storage. With a maximum load-bearing capacity of 150kg, the ladder is suitable for various users and tasks. Its lightweight design and portability make it easy to transport and store anywhere, even in car trunks. The Herzberg HG-5260 is suitable for both indoor and outdoor use, catering to different working environments.

Choose the Herzberg HG-5260: Aluminum Telescopic Ladder with Anti Slip Footing, and tackle the most challenging and hard-to-reach jobs effortlessly, saving you valuable time and money. Its high-quality construction ensures durability, while its user-friendly features make it the go-to ladder for all your projects, be it inside your home or outside in the yard. Trust in its versatility and performance, and make your tasks safer and more efficient with this reliable telescopic ladder.

## Features:

**Heavy-Duty Aluminum Construction:** The Herzberg HG-5260 Telescopic Ladder is built with high-quality anodized aluminum, ensuring durability and longevity. Its robust construction can withstand heavy use and provide reliable support for various tasks. **Adjustable Height and Angle:** This telescopic ladder features an adjustable lever that allows you to change its length, providing versatility for different projects. The ladder can also be positioned at multiple angles, offering flexibility for various working environments. **Anti-Slip Footing:** Safety is a top priority, and the HG-5260 is equipped with anti-slip feet to enhance stability and prevent accidents during use. You can work with confidence, knowing that the ladder will provide a secure and stable footing. **Compact and Portable:** The ladder's foldable design and lightweight construction make it highly portable and easy to transport. It collapses to a width of 46.5cm, allowing for convenient storage in tight spaces or even in your car trunk. **Suitable for Indoor and Outdoor Use:** Whether you need to reach high shelves indoors or work on outdoor projects, the Herzberg Telescopic Ladder is up to the task. Its versatile design caters to a variety of working environments and tasks. **Maximum Load-Bearing Capacity:** With a maximum load-bearing capacity of 150kg, this ladder can handle heavy loads, making it suitable for various users and tasks. **Easy to Use and Store:** The ladder's slide grid lock mechanism allows for effortless collapsing of the steps, facilitating quick and convenient storage. It also comes with installation tools and simple instructions for easy setup. **Versatile and Multi-Functional:** The HG-5260 can be used for a wide range of applications, from DIY projects to professional construction work. Its multi-angle positioning and adjustable height make it an essential tool for different jobs. **Safe and Sturdy Design:** The ladder's sturdy 2.6mm thick hinge and elastomer suspension provide added stability and support, eliminating the need for external assistance during use. **Value for Money:** The Herzberg HG-5260 offers unbeatable value, combining quality, performance, and affordability. It is a wise investment for anyone in need of a reliable and durable telescopic ladder.
