**Herzberg HG-5560: Retracting Aluminum Telescopic Ladder - 5.60M**

**Herzberg HG-5560: Retracting Aluminum Telescopic Ladder - 5.6M**

Introducing the Herzberg HG-5560: Retracting Aluminum Telescopic Ladder - 5.60M, a practical and robust ladder that meets the EN131 standard. Crafted from Aerospace Engineered 6061 alloy with a smooth anodized finish, this ladder guarantees durability and toughness for any task. Weighing only 19.50kg, it's lightweight and easy to transport, making it the perfect companion for any job. With a width of just 54cm, it takes up minimal space and fits effortlessly in your car compartment, ensuring convenience wherever you go. Designed with ergonomics in mind, this foldable and compact ladder is ideal for industrial, commercial, and home use.

Each section of the ladder can be locked independently, providing adjustable heights for every situation. The elastomer suspensions ensure stability and balance on various terrains, even in rugged conditions. The smart mechanism securely closes the retracted ladder, allowing for a smooth descent. Safety is a top priority, and this ladder's locking system operates

effortlessly and securely.

Versatile and reliable, the Herzberg HG-5560 is your go-to tool for changing light bulbs, painting walls, cleaning windows, and even reaching difficult spots like gutters. Its multi-purpose design includes a heavy-duty trestle ladder and multiple angle options, making it adaptable to various tasks. The ladder extends and locks by the foot with an easy no-pinch closure system, providing practicality and ease of use.

Crafted from aerospace engineered 6061 alloy, this ladder is both versatile and affordable, offering unbeatable value for money. The specialized non-slip molded foot ensures stability and security during use. Additionally, the smart locking system and stabilizer bar provide solid support, making it suitable for both industrial and home applications.

Transportation is hassle-free with the integrated carrying handle, and the ladder can be securely stored using the heavy-duty closure strap. With a maximum height of 5.60m and a 150 kg weight capacity, this ladder caters to various needs. It is the ultimate solution for professional contractors, handymen, and DIY enthusiasts alike.

Experience convenience and efficiency with the Herzberg HG-5560: Retracting Aluminum Telescopic Ladder - 5.60M. Take on any challenge with ease and complete your tasks safely and effectively. Whether it's for industrial purposes or home use, this ladder is your dependable partner. Shop now and unlock new heights of productivity and success!
