

Royalkraft Line MIG150; Welding Machine

Royalkraft Line MIG150; Welding Machine

Reference:MIG150

MIG150

The new modern welding, by RoyalKraft Line, is manufactured with the latest technology. Electroflux offers professional results and is ideal even for beginners. The welding arc is formed between the material to be welded and the welding wire and is fed through the welding gun. The power cord is powered mechanically by the cable feeder.

The welding is manufactured to a high level for superior strength and durability, while Inverter technology allows a high output of 220 V. It is compact and lightweight design with full adjustable power control and cable speed control and carry handle so you can easily carry it and use it in any location.

The package includes:

- The welding
- Earthing cable
- Welding visor
- Wire brush
- Welding torch
- Mini cable (wire)

Characteristics:

Maximum DC power output: 105 - 15%

Turbo fan (cooled)

Requires wire cable (included)

Power: 220 V

Adaptation positions: 4

Insulating category: H

Protection type: IP21

Power supply: 50 / 60Hz

Dimensions: 34 x 18.2 x 29 cm

Maximum power absorbed: 3.6 KVA

Welding wire diameter: 0.8 - 0.9

DC power output: 50 - 150 A

Weight: 16.5 Kg

EAN :	0634158797569
ISBN :	84688000
Weight :	16.30 Kg
Volume :	0.04126 m ³
(L x l x H) :	46.00 cm x 39.00 cm x 23.00 cm
Box	1 units
Box dimensions	23 x 39 x 46
